

PHAN DOAN ANH NHAT

RIGGING TECHNICAL ARTIST | PIPELINE TECHNICAL ARTIST

Address: Unit 2.2, Block B3, 189B Cong Quynh, Nguyen Cu Trinh Ward, Dist. 1, HCMC **Phone:** (+84) 0937 565 001

Email: tisun2011@gmail.com **DOB:** Nov 20, 1981

PROFESSIONAL PROFILE

Rigging and Pipeline Technical Artist with an academic foundation in Mathematics and verified AAA game/film credits at Sparx* – A Virtuos Studio. Expert in full-body modular rigging frameworks, custom Maya deformer engineering (`MPxDeformerNode`), independent MetaHuman facial fitting in Maya (free from UE DNA), layered skinning workflows, and advanced Unreal Engine 5 Control Rig, retargeting, and Sequencer batch baking pipelines.

CORE TECHNICAL COMPETENCIES

AUTODESK MAYA RIGGING & TOOL DEV

Body Modular Rigging Toolkit (FK/IK/3-bone stretch/anti-pop/poleLock), Native Facial Fitting (MetaHuman replica without UE DNA), Layer Skinning

APPLIED MATHEMATICS & DEFORMATION

Vector calculus, rotation matrices, quaternions, kinematics solvers, volume preservation, Maya C++/OpenMaya API 2.0 deformers

UNREAL ENGINE (5.X) INTEGRATION

Custom Control Rig graph & C++, IK Retargeting, complex Animation Blueprint setups, automated Level Sequencer animation baking

LANGUAGES, SHADERS & PIPELINE

Python (OpenMaya, maya.cmds, UE Python API), C++, PySide/PyQt, HLSL/GLSL shaders & viewport tools, Perforce, PowerShell

FLAGSHIP AAA PRODUCTION VISUALS

Sparx* Virtuos Credits

Metal Gear Solid Δ: Snake Eater — Senior Technical Artist (Cinematics)

Halo: Campaign Evolved — Technical Artist

VERIFIED PRODUCTION CREDITS

Project / Title	Client & Publisher	Credit Role	Format
Metal Gear Solid Δ: Snake Eater	Konami / Sparx* Virtuos	**Senior Technical Artist**	AAA In-Engine (UE)
Demon's Souls	Bluepoint / PlayStation / Sparx*	Technical Artist / Rigging	AAA Action RPG
The Quarry	Supermassive / 2K Games / Sparx*	**Senior Rigging Artist**	AAA Video Game
Halo: Campaign Evolved	Xbox Game Studios / Sparx*	**Technical Artist**	AAA Video Game
Vic the Viking & the Magic Sword	Studio 100 Animation / Sparx*	Rigging Artist	Animated Feature
Avowed	Obsidian / Xbox Game Studios / Sparx*	**Rigger**	AAA Video Game
LEGO Star Wars: All-Stars / Rebels	Lucasfilm / Disney XD / Sparx*	Character Rigging Assets	Animated Series

PROFESSIONAL STUDIO EXPERIENCE

Senior Technical Artist / Senior Rigging Artist / Pipeline TA • **Sparx* – A Virtuos Studio** *Ho Chi Minh City, Vietnam*

- Authored custom Unreal Engine Control Rig systems for *Metal Gear Solid Δ: Snake Eater (Cinematics)* powering virtually all character performance published in-engine.
- Established high-fidelity deformation standards and modular rigging assets as Senior Rigging Artist on *The Quarry*.
- Engineered automated batch retargeting and Level Sequencer baking tools via the Unreal Python & C++ API, matching frame ranges and syncing root motion for massive asset lists.
- Created custom Python and PySide toolkits in Maya for advanced skin weight interpolation, topology mirroring, and multi-department handoffs.
- Delivered character and creature rigging across AAA productions (*Demon's Souls*, *Halo: Campaign Evolved*, *Avowed*) and feature animation.

Trainee Rigger • **Sparx* – A Virtuos Studio** *Ho Chi Minh City, Vietnam*

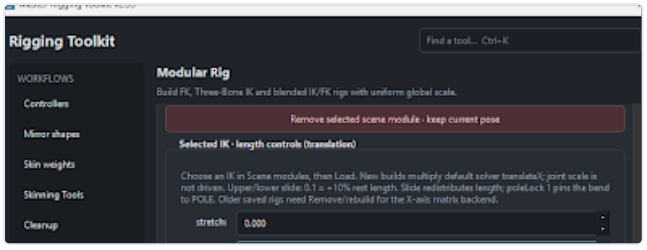

- Constructed modular biped/quadruped skeletons, IK/FK switching, ribbon spines, and animator-facing controls adhering to AAA studio standards.
- Applied linear algebra to debug joint alignment, gimbal lock, and non-linear deformation artifacts.

AUTHORED RIGGING & PIPELINE TOOL SUITES

Proprietary DCC & Engine Software

Maya Modular Rigging Toolkit

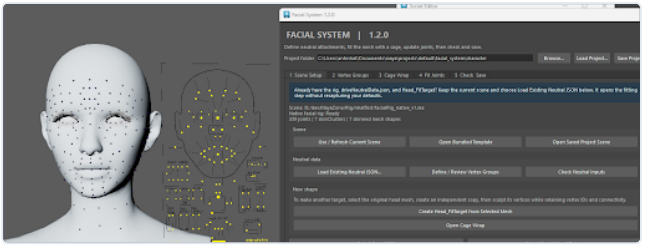

PySide / OpenMaya

Modular framework building FK, 3-Bone IK, and blended IK/FK limbs with uniform global scale, stretch, anti-pop, upper/lower slide, and pole-lock controls.

Maya Native Facial Fitting System

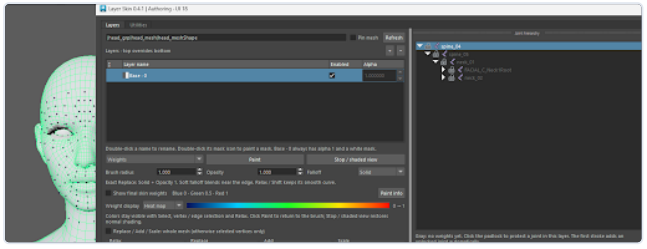

MetaHuman Replica (No UE DNA)

Independent facial architecture mimicking MetaHuman rigs in native Maya (339 joints, 7 skinClusters, neutral JSON, cage wrap, and joint auto-fitting).

Layer Skin Authoring Tool

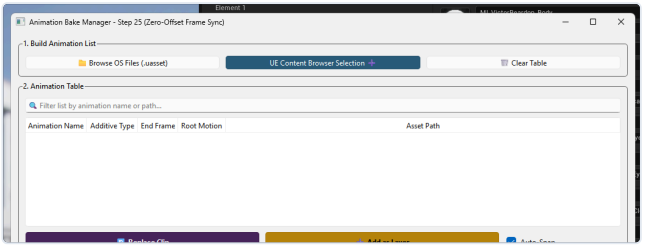

Advanced Skinning Workflow

Non-destructive layered skinning utility featuring layer masks, alpha blending, interactive heat-map weights, distance-to-bone assign, and relax operations.

UE Animation Bake Manager

Zero-Offset Frame Sync / UE API

Batch retargeting tool pushing animations into Level Sequencer with automated time-range alignment, zero-offset sync, root motion, and multi-mesh baking.

EDUCATION

Bachelor of Mathematics *Ho Chi Minh City, Vietnam*

Specialization: Vector Algebra, Matrix Transformations, Quaternions, Numerical Methods & Computational Geometry
